

# MunichTech EXPO 2026 Operations & AI Workflow Coordination Proposal

Scalable Execution Meets Intelligent Automation

**Prepared By:** Eronmosele Austin Oboh

[www.munichtechexpo.com](http://www.munichtechexpo.com)

# Executive Summary

## Strategic Focus:

Operational strategy centered on scalable execution and AI-supported workflows

## Integrated Approach:

Combines operations, automation, communication, and ecosystem management

## Core Goals:

Improve attendee experience, enhance operational visibility, maximize workflow efficiency

## AI Integration:

Leveraging intelligent automation for real-time coordination and decision support

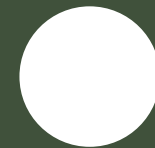

# Event Operations Structure

## **Registration & Ticketing:**

End-to-end ticket management, QR code generation, check-in systems, and badge printing

## **Speaker Coordination:**

Invitation workflows, session scheduling, AV requirements, and live presentation support

## **Sponsor & Exhibitor Ops:**

Agreement processing, branding delivery, booth setup coordination, and activation support

## **Venue & Logistics:**

Facility management, equipment setup, signage, catering, and volunteer deployment

# Core Operational Workflows

## Critical Event Processes

### Attendee Journey:

Ticket → QR Code → Check-In → Badge → Sessions

### Speaker Workflow:

Invitation → Confirmation → Session → Live Support

### Sponsor Workflow:

Agreement → Branding → Booth Setup → Activation

### Incident Escalation:

Issue Detection → Operations Lead → Resolution

# Operational Timeline

## 90 Days Before:

Venue planning and logistics coordination. Sponsor outreach and partnership agreements. Speaker onboarding and session planning.

## 30 Days Before:

Agenda finalization and schedule lock. Volunteer recruitment and training. Testing systems and operational briefings.

## Event & Post:

Live execution and escalation management. Real-time monitoring and incident response. Post-event reporting, analytics, and sponsor follow-up.

# AI Workflow & Automation Concepts

## **AI Sponsor Onboarding:**

Automated welcome sequences, document collection, and branding asset coordination for sponsors

## **AI Speaker Follow-Up:**

Intelligent reminders for session confirmations, bio submissions, and presentation uploads

## **AI Matchmaking:**

Smart attendee recommendations based on interests, industry, and networking goals

## **AI Chatbot & Summaries:**

24/7 FAQ support and AI-generated operational reports for real-time insights

# Hackathon Coordination Logic

## **Participant Scale:**

- 100 participants organized across 20 competitive teams with dedicated mentor and judge coordination

## **AI Team Formation:**

- AI-assisted team matching based on skills, interests, and experience levels for optimal collaboration

## **Real-Time Communication:**

- Integrated Slack and Discord channels for instant updates, mentor support, and team coordination

# Operations Dashboard Concept

## Sponsor & Speaker Tracking

Real-time monitoring of sponsor onboarding status, exhibitor booth assignments, and speaker confirmations

## Ticket Sales Monitoring

Live dashboards tracking ticket sales velocity, attendee growth trends, and registration analytics

## Task Management

Centralized deadline tracking and task coordination using Notion and Airtable workflows

## Incident Escalation Monitoring

Live operations monitoring with Power BI for rapid issue detection and resolution tracking

# Crisis Scenario Management

## Emergency Response Protocol

### Volunteer Coordination:

Address breakdown scenarios with backup pools and rapid redeployment protocols.

### Registration Spike Handling:

Stabilize surges with extra check-in capacity and overflow queue management.

### Backup Speaker Activation:

Maintain standby speaker roster for rapid session replacement.

### Sponsor Issue Resolution:

Rapid escalation pathways to resolve branding and booth concerns.

### Calm Communication:

Maintain operational visibility with clear team updates.

# AI Operations Command Center

## Live KPI Dashboards:

- Real-time tracking of attendee flow, ticket sales, and operational metrics across all event zones

## Predictive Management:

- AI-powered crowd analytics and risk forecasting to prevent bottlenecks and safety issues

## Integrated Workflows:

- Automated operational summaries, alerts, and seamless system integration across platforms

# Conclusion

## Summary & Key Takeaways

### **Operational Excellence:**

This proposal demonstrates comprehensive operational thinking with scalable coordination frameworks design for MunichTech EXPO 2026's complexity.

### **AI-Powered Innovation:**

Combines business operations with AI-supported workflow optimization for enhanced efficiency.

Focuses on practical execution, clear communication, and operational maturity throughout.
